SMART® solutions for the modern workplace

Simpler interactive workspaces for better collaboration
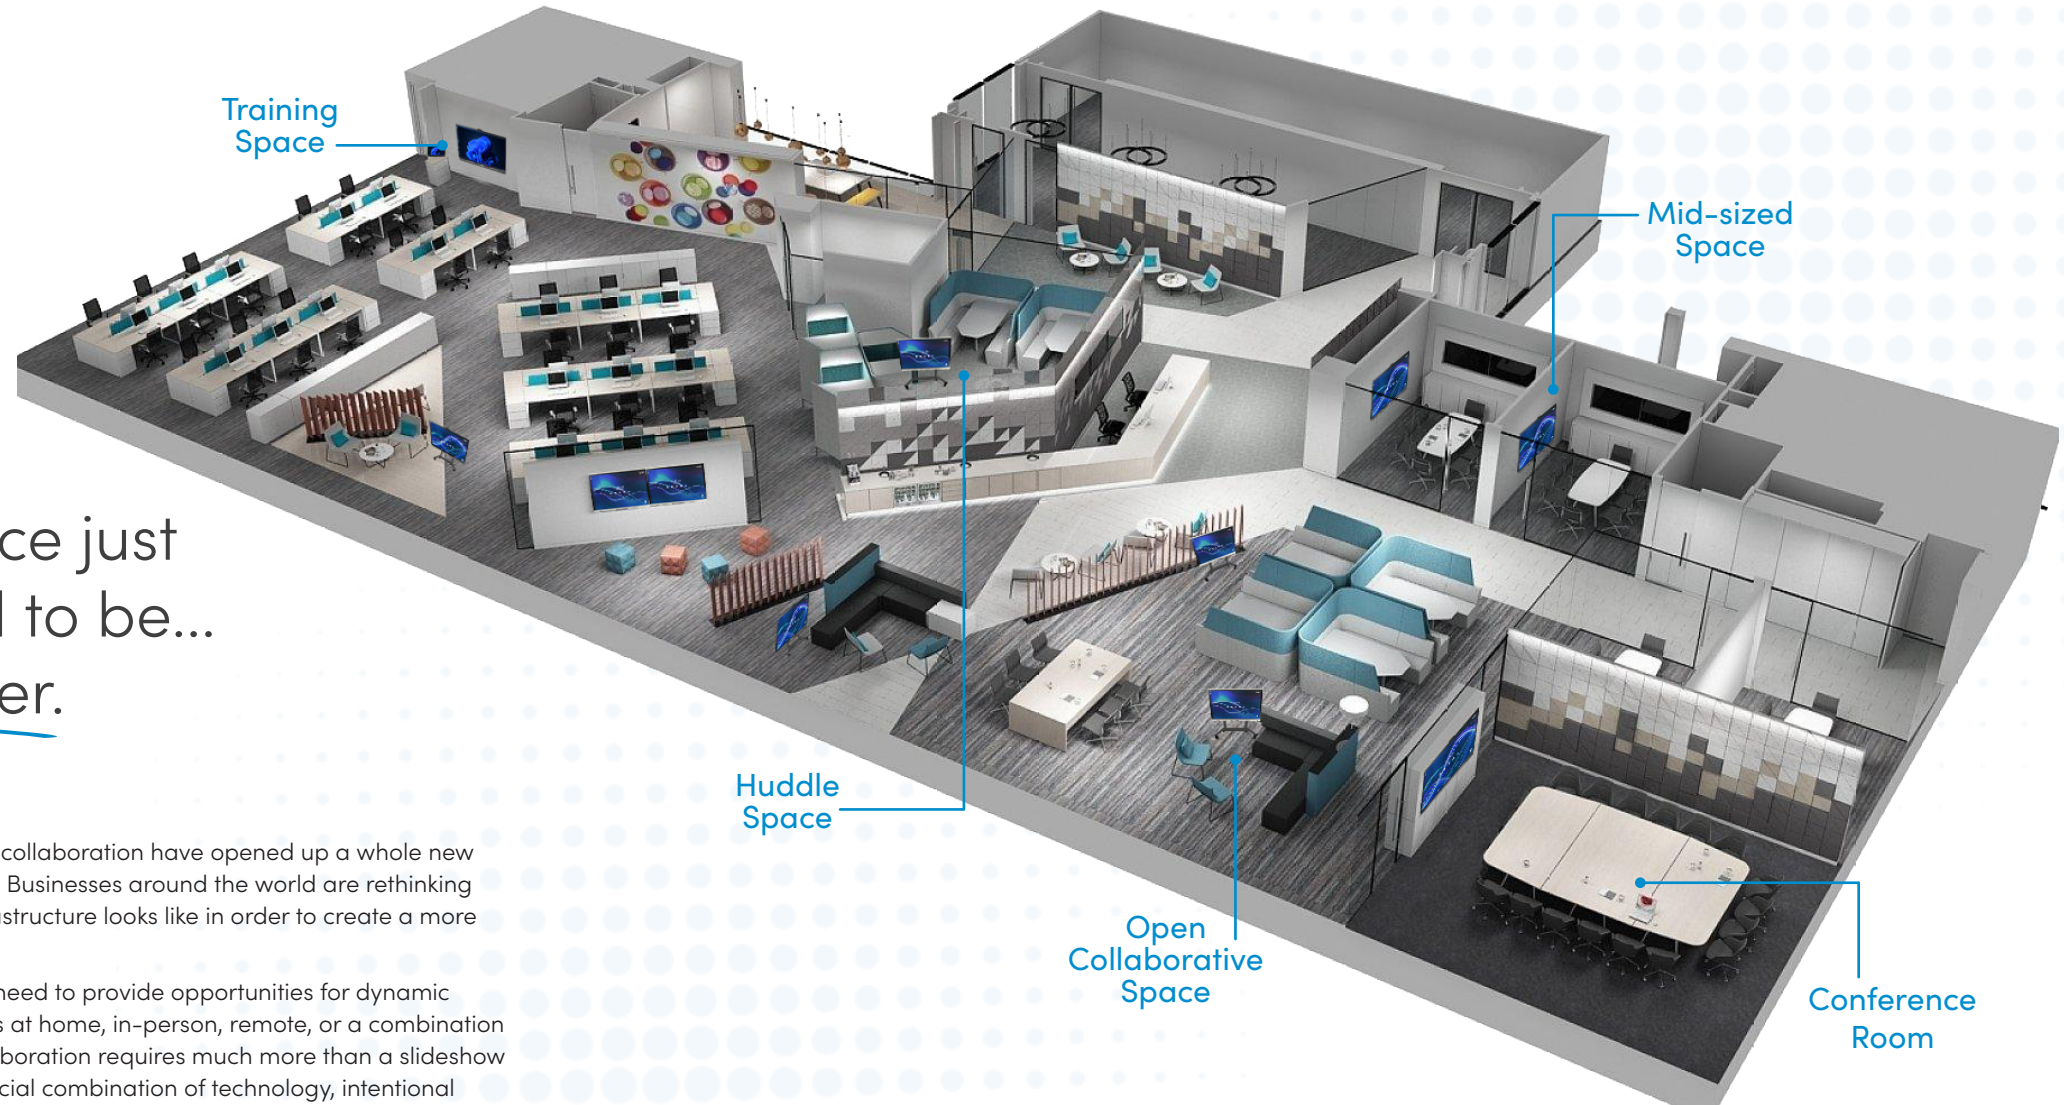

The modern workplace redefined

Going to the office just isn't what it used to be...
...it's better.

Exciting, dynamic opportunities for collaboration have opened up a whole new world of workspace configurations. Businesses around the world are rethinking what their physical and digital infrastructure looks like in order to create a more compelling work environment.

Today's employers know that they need to provide opportunities for dynamic collaboration, whether their team is at home, in-person, remote, or a combination of all three. And truly effective collaboration requires much more than a slideshow and chat features. It requires a special combination of technology, intentional space design, and modern, dynamic systems.

This guide will showcase some of the best ways that businesses can set up their employees for truly effective collaboration by designing productive and empowering meeting spaces. Investing in best-in-class meeting and collaboration tools can result in teams that feel excited and motivated to generate ideas and solve problems faster and more effectively.

Training Space

Mid-sized Space

Huddle Space

Open Collaborative Space

Conference Room

Quality improvements

made as a result of workplace collaboration are **valued at $2,517 per employee each year**.[1]

Unlike isolating cubicle culture, collaborative open spaces provide freedom for impromptu collaboration sessions, brainstorming, and one-on-one meetings. Their casual nature is accessible for anyone, anytime.

Organic connection helps promote innovative, out-of-the-box thinking, the kind that excites, invigorates and ultimately solves real problems. It also creates a connectedness among workplace peers that increases levels of work satisfaction.

The best collaborative spaces will be spacious, have varied seating options, tons of room to ideate, and will have ample natural light. Design-wise, these rooms should be a blend between a high-energy coffee shop and a conference room.

SMART solutions enable the best collaborative spaces with display options that allow for multiple users to brainstorm, ink, create, and manipulate content together. These displays are one-touch ready, easy enough for anyone to walk up and use instantly, which increases productivity and the unhindered flow of ideas.

People who collaborate on the job and who have access to digital collaboration tools are up to **17% more satisfied** with their job and workplace culture.[1]

Open Collaborative Spaces

SMART Mobile Stands
Add flexibility and mobility

SMART OPS PC Module
The power of Windows® 11 Pro—no laptop needed

The tried and true conference room can hold meetings of critical importance and leaders can feel confident that privacy will be ensured for their clients or peers. These rooms can typically accommodate larger groups at once, and are often equipped with room control systems and schedulers.

The right conference room will minimize disruptions and improve focus when running important meetings with both in person and remote members.

SMART solutions allow conference leaders and stakeholders to seamlessly and clearly communicate their message. SMART displays come equipped with easy-to-use visual manipulatives that are necessary for communicating complex ideas, and sophisticated markup capabilities allow ideas to be explained thoroughly and candidly. SMART displays work with most popular video conferencing apps, such as Microsoft Teams™, Zoom™, Google Meet™ and Webex™, so that remote participants can always be a part of the mix.

An estimated **$37 billion** is lost per year to unproductive meetings.[2]

smarttech.com | SMART

Informal and great for impromptu small group meetings, huddle spaces allow for more privacy, which fosters deeper group exploration and problem solving.

The easy-to-access huddle space encourages the sort of casual camaraderie that begets highly productive decision-making. The economical size and setup of huddle spaces make it a cost-efficient use of space, and double as temporary workspaces for remote workers.

Effective huddle spaces should feature high-speed connectivity that allows content to be displayed from any device, integrated video conferencing, and should be accessible for anyone to use spontaneously.

SMART solutions in huddle spaces effectively support small, dynamic teams, by providing the right tools for problem solving and real-time collaboration. A SMART interactive display allows groups to spontaneously pull up documents, mark them up, and brainstorm actively, on the board, in real time, with the added capability of being able to add remote participants at any time.

SMART OPS PC Module
The power of Windows® 11 Pro—no laptop needed

According to a Stanford University study, the mere feeling of working together allowed participants to stick to their tasks **64% longer** than solitary workers.[1]

Huddle Space

The return to in-person workspaces makes it a key time to develop spaces that allow employees and cross-functional teams to learn together. When participants are engaged and interested, employees contribute to higher retention rates within organizations.

Training space design is key to ensuring information sticks. Beyond an unobstructed view of the presenter, the ability to shift layouts between café and classroom style, to boardroom and horseshoe style, help make these spaces most effective.

A SMART interactive display in your training space is a powerful tool for achieving learning and development objectives. SMART Ink helps presenters capture the attention of participants, improve retention, and increase engagement with real-time, dynamic annotations, whether on site or remotely. A variety of walk up and use pens gives instructors the ability to convey ideas and focus participants' attention on content.

With SMART Podium™ interactive pen display, instructors can dynamically share content on SMART interactive displays and engage participants in training sessions versus passive information sharing leading to content retention and understanding of concepts.

Training space

40%
of existing workers will require up to six months' worth of reskilling.[3]

SMART TeamWorks™
Your end-to-end
meeting solution

Mid-sized meeting rooms should be an adaptable space ready to facilitate small groups and team meetings. They are a great middle ground between the casual nature of huddle rooms and more official conference settings. For the everyday meetings that facilitate the majority of business objectives, mid-sized rooms are the name of the game.

Mid-sized rooms are ideal for hybrid teams that are made up of both in-person and remote members. A well-designed mid-sized room should include space and seating for roughly 8-10 people, though often much smaller groups will use the space.

SMART solutions in mid-sized rooms feature technology that can be adapted by each group who uses it. SMART interactive displays offer best-in-class annotation and collaboration tools along with high-quality video-conferencing solutions to cater to the dynamic needs of in-room and remote teams. Strong visuals and dynamic, interactive presentations that allow users to effortlessly interact with content are some of the added benefits of choosing SMART.

Mid-sized rooms

3 out of 4 employees rate teamwork and collaboration as being very important.[1]

Sharper, brighter and high-contrast visuals with 4K Direct LED technology.

Integrated powerful speakers
Exceptional sound clarity with two integrated powerful front-facing 20W speakers.

Integrated mic-array
Capture clear audio with an integrated six-microphone array.

Two power-packed USB-C ports
One rear 65W and one front 15W USB-C port that supports video, touch, audio and data with one cable.

SMART Board
GX series

The SMART Board® GX series is the affordable interactive display that keeps quality at the forefront of its design. Elevate your meetings and empower your teams with the display that combines a low price with all the reliability SMART stands for.

Up to 52% more energy efficient compared to other interactive display brands*

65" | 75" | 86"

Leverage Android
The GX series is built with and embraces all the recent security practices of Android 11.

Write like pen-on-paper
Enjoy up to 40 touchpoints with pens that provide a smooth and accurate inking experience within any app.

Use any system
Connect your preferred operating system and enjoy the full SMART Board experience.

Meet your way
Host and join remote meetings using your favorite apps: Microsoft Teams, Zoom, Google Meet, Webex, and more.

Ink efficiently
SMART Ink desktop annotation software enables participants to directly annotate into PDF and MS Office files without clunky overlays or app switching.

Set up with no fuss
Supports HDMI, dual USB-C, USB-B, USB-A, and VGA ports. No additional adapters required.

Make decisions with clarity
Share ideas with greater impact through a stunning 4K UHD LED display.

Hear every detail
A pair of powerful speakers provide up to 40W of crisp audio.

Connect Seamlessly
Integrated Wi-Fi 6 ensures you're ready to connect to the internet and your local network straight out of the box.

SMART
Podium
Interactive pen display

Empower business professionals, trainers, first responders and military personnel to communicate more easily and effectively, in the workplace, in the field, or from home. The SMART Podium with a battery-free pen works with Windows or Mac OS computers to provide touch, gestures and digital ink while video conferencing, or while projecting an image to a projector or display.

SMART Electric Height-Adjustable Stands with integrated power bar* turns any space into a collaborative space with only one cord to plug into the wall. SMART's wall stand eliminates the need for expensive wall reinforcement, and provides height adjustment for up to 86" interactive displays, flexibly enabling hands-on collaboration and presentations to large audiences.

SMART
Stands

Plug & Play
Enjoy SMART's best-in-class interaction on connected computers, including 10 points of precise interaction and fluid integration with native inking tools like Windows Ink.

SMART Ink
Experience digital ink even in applications without ink tools with included SMART Ink desktop annotation software.

Project at any size
Project analog or digital video to any size projector or display with HDCP compliant video out for crisp and clear content in rooms of any size.

Palm rejection
Write, gesture and navigate comfortably while resting your palm on the display.

Adjustable stand included
Use the podium for hours at any angle without finger burns on an anti-glare, ultrasmooth surface and a stand adjustable between 11° to 73°.

Cordless battery-free pen
Navigate and mark up content effortlessly using a battery-free cordless pen with pressure inking, a built-in eraser and customizable buttons.

Flexibility and mobility
Convert any space into a learning or a collaboration space by adding flexibility and mobility to your installations with SMART's mobile stands.

Height-adjustable
Industry-leading height adjustment SMART mobile stands support a variety of collaboration environments.

Fully UL listed
Suitable for all SMART interactive display sizes, SMART stands are fully UL listed for robust standards for safety and stability you can rely on.

5-year warranty
SMART mobile stands come with an industry-leading, best-in-class 5-year warranty to give you the peace of mind you deserve.

Optional add-ons
Add-on laptop shelf, handles and cord hook options are available.

Model availability may vary by region.

SMART
OPS PC
modules

Access Microsoft® Office files and all your applications on a full Windows 11 Pro computer right at the display for true walk up and use simplicity. SMART OPS PC modules allow for a simple, standardized deployment in organizations, and provide ease of mobility and flexible use for your interactive display.

SMART Meeting Pro visual collaboration software allows colleagues to create and capture ideas in the virtually unlimited interactive workspace. The whiteboard expands as users add images, files, links and notes—even over multiple displays and meetings—enhancing collaboration.

SMART Meeting Pro

Superior system performance
SMART OPS PC modules give your interactive display the ultimate computing experience with the combined power of Windows 11 Pro and Intel processors.

Custom options available
SMART OPS PC modules are available with different processor memory (RAM) and storage (SSD) options.

Windows Autopilot enabled
Easily set up new devices, save time and deliver a standardized user experience.

Switch between an embedded iQ Pro experience and a Windows experience
Combine the flexibility of an embedded iQ Pro Android experience with the simplicity of a Windows experience for seamless interactive collaboration.

4K Ultra High Definition
Experience a complete rich and immersive Windows environment in 4K UHD on a SMART interactive display with SMART OPS PC computing modules.

Integrated Wi-Fi hotspot
Easily and securely connect up to 8 devices with the OPS PC module's mobile hotspot.

Simplified peripheral connections
Access UVC devices connected to the interactive display, such as webcams and keyboards, directly through the OPS PC module.

Leverage dynamic content
No space restrictions—pan in any direction and zoom in and out in an unlimited whiteboard space.

Leverage multiple displays
Connect up to 8 displays to the same workspace and control what content appears on which screen with a Room license. Notes on one display show up on all the others.

Advanced writing
Easily convert handwritten notes to text with a touch using the default calligraphic pen that automatically styles writing into regular, sleek lines.

Integrated screen capture
Quickly import content from any application into the workspace using the screen capture tool from the SMART Meeting Pro menu.

Access the workspace
Enable colleagues to prepare, review and work on files and collaborate with co-workers before, during and after a meeting from anywhere with a Personal license.

Customized templates
Build out customized galleries using your company's templates. Organize your galleries using folder names and export them for use throughout your organization.

SMART TeamWorks

Experience an end-to-end meeting solution that is designed for fast, flexible, and limitless connectivity, collaboration, and engagement. Share screens, access personal cloud storage and calendars, open a collaborative whiteboard, and launch meetings faster with one touch, all from the home screen with SMART TeamWorks.

SMART Remote Management is a cloud-based device-management tool that provides a one-stop solution for technology administrators to maintain, control, support and secure devices from any web browser. SMART Remote Management is designed to centrally manage all SMART Board displays with iQ.

SMART Remote Management

Launch meetings faster
Launch meetings with one touch from the home screen on most popular conferencing platforms such as Microsoft Teams, Zoom, Google Meet, Webex and more.

Windows 11 compatible
Enjoy video-conferencing platform versatility and extensive whiteboard collaboration on a powerful Windows 11 computer with a connected SMART OPS PC.

Collaborate and share
Wirelessly screencast up to 8 devices with native Airplay, Google Cast and Miracast. Share content remotely and increase collaboration with mark-up capabilities on shared screens.

Bring your device
Access your OneDrive, Google Drive and Dropbox files and personal calendar directly from TeamWorks by simply scanning a QR code.

Leverage dynamic content
Add and interact with dynamic content in a collaborative whiteboard. Draw and work with multiple objects including images, PDFs, Microsoft Office files, sticky notes and more.

Save and share your work
After a meeting, save your workspace to your TeamWorks app or save and share a PDF recap with meeting participants.

Control any device from anywhere
Control and manage iQ-powered SMART interactive displays and iOS, Android, Chrome OS™ and Windows devices from one central location.

Save deployment and management time
Provide support, push applications and files, and change system settings on one or all devices through a single intuitive dashboard from your fingertips.

Real time reporting with an intuitive dashboard
Get a real-time summary view of not only your iQ-powered SMART displays, but your entire mix of licensed devices—no matter their location.
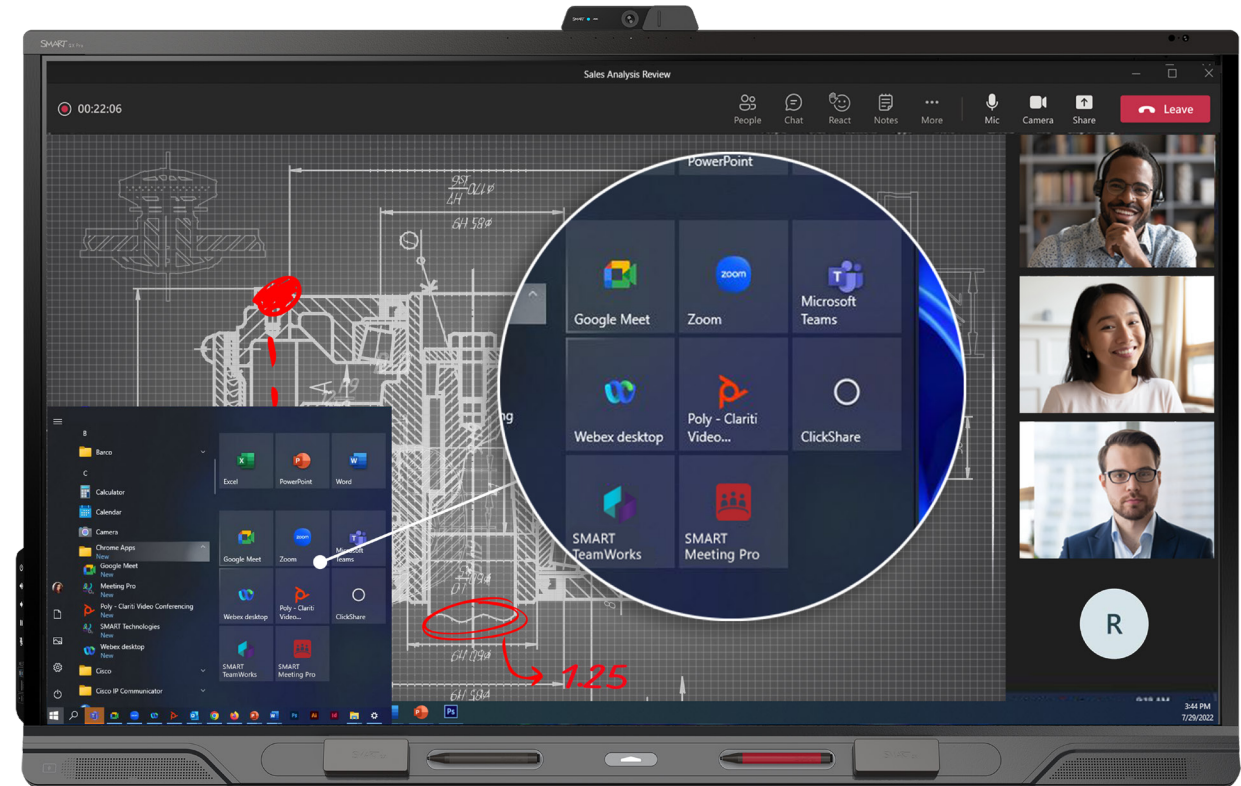

Install apps remotely
Easily install and manage apps remotely on a single device or multiple devices. You can also set up a workflow to perform multiple actions at once.

Security at your fingertips
Get complete peace of mind with features such as tracking and locking devices, block listing or allow listing website URLs or apps, pushing security settings certificates, setting triggers and alerts, and even sounding an alarm.

Manage device fleet configuration
Manage any size of device fleet, from hundreds to hundreds of thousands of devices. Control your displays at a group level, so you don't have to manage them one by one.

SMART interactive displays and collaboration software are designed to offer the best-in-class interactivity and value to organizations globally. Endless compatibility and increased flexibility of choice with industry-leading technology partners, SMART solutions connect well with your organization's existing ecosystem.

SMART interactive displays not only work well with popular video-conferencing platforms such as Microsoft Teams, Zoom, Google Meet and Cisco Webex, but also integrate with some of the big names in audio visual technology such as Microsoft Teams Room certified Logitech cameras, Crestron, Windows, Poly, Miro, Barco and more.

Compatible with SMART solutions

Engineered for true longevity

It's no secret. From the earth to your boardroom, the journey of an interactive display has an impact on the environment. We consider this impact and that is why at SMART, a fair, humane and sustainable way of doing business is not just a goal but a requirement.

Designed for the future, with industry-leading upgradability and product lifespan, SMART displays with iQ maximize your technology investment.

Touch engineered for excellence
With 35+ years of in-house development experience and 400 tech patents and growing, SMART interactive displays take the industry's next generation touch technology to places no other manufacturer does.

Designed to last
SMART interactive displays survive intensive accelerated life testing, including extreme temperature, humidity and voltage testing, ensuring less downtime and longer lifespan.

Cutting edge chip and port selection
SMART's long term industry experience with SOC (system on a chip) manufacturers gives us access to cutting edge chip and port selection, anticipating technology trends to provide future-proofed technology.

Hassle-free OTA-updates to SMART-developed Android platform
Automatically benefit from patches and updates to Android, plus SMART apps and features, so your technology stays secure, lasts longer and keeps up with the market.

Small footprint. Giant strides.
We are constantly identifying ways to reduce our own carbon footprint and support you on your journey to net zero. Our packaging is recyclable and our latest optimized packaging initiative has reduced packaging design and materials, allowing us to fit up to 30% more products into shipping containers.

Efficiency energized.
Being ENERGY STAR® certified and EcoDesign compliant, our interactive displays are designed to help you lower power consumption and carbon footprint. Built-in sensors allow our displays to sleep and wake up automatically for a more energy-efficient performance.

Sourced ethically and responsibly.
We are committed to sourcing components and materials from companies that share our values on human rights, ethics, and environmental responsibility. We diligently evaluate and audit our direct suppliers on their commitment to becoming conflict-free.

ISO 14001 : 2015 certified | RoHS compliant | WEEE compliant

Sustainability is at the core of our innovation

TRAINING AND SUPPORT SERVICES

Get the best out of your SMART Business Solutions

Partnering with SMART means we don't leave you to figure out how to use your collaboration solution—we help you achieve your goals. SMART provides training and has several installation and support services options to fit your needs and budget.

Training

SMART's professional training program is designed to help you and your team use SMART products to collaborate, communicate and contribute effectively in real-time. Whether in-person or through a hybrid environment, SMART Professional Training solutions are an engaging and effective way to successfully upskill and re-skill your team.

Support

SMART's global support team has the experience, knowledge and resources to ensure consistent, fast and effective support. Make your SMART experience simply seamless with a host of warranty options, training resources and technical support.

Discover SMART solutions designed to meet the needs of modern workplaces.
