

# SMART® Interactive Displays with iQ

## ENGINEERED FOR TRUE LONGEVITY

Designed for the future, with industry-leading upgradability and product lifespan, SMART displays with iQ maximize your technology investment.

**SMART.**  
**35**  
YEARS OF HISTORY

**400**  
PATENTS & GROWING

Supporting interactive technology displays a proven commitment through the long lifespan of SMART products.

**FULL LIFETIME COMMITMENT**

Paving always a path forward within the SMART ecosystem that enables customer investments to be maintained and upgraded. (iQ)

## SMART LONGEVITY

### LIFE EXPECTANCY OF EMBEDDED COMPUTING SUPPORT

SMART is committed to maximizing usability of the full 50,000 hrs of your display's lifespan with support for a future-proofed embedded computing solution.

FOR THE FULL

**50**  
THOUSAND HOURS

### LIFE EXPECTANCY OF LED DISPLAY COMPONENT

**BRIGHTER SHARPER QUALITY**  
Visuals

SMART's 4K, Ultra HD SMART displays use top tier commercial LED displays to provide better visuals than projectors, and eliminate expensive bulb replacements.

### LIFE EXPECTANCY OF HARDWARE COMPONENTS

**RESEARCH + LATEST TEACH**

- Cutting-edge chip and port selection
- SMART-owned and purpose-designed iQ user interface on the Android platform
- Continual improvement of the world's best touch technology for multi-user interactivity
- Future-facing, integrated peripherals
- Supporting current software version & two previous software point releases.

Future-facing hardware design

Hassle-free OTA-updates to SMART

Android iQ appliance modules for extended life

"SMART engineers plan and build every aspect of our products for longevity, researching and anticipating technology and education trends to make sure your interactive display has a long lifespan that continues to support the latest technology..."
