# Powered by iQ

A powerful platform for engaging teaching, full of integrated interactive teaching tools and resources. iQ is easy to use with any content regardless of technology comfort level – all out of the box, no computer required.

- **Built-in whiteboard, designed for learning:** Everything you need to bring instruction to life. Use graphic organizers and backgrounds, images, video and digital manipulatives to instantly create activities or enhance existing lessons.
- **Student device integration, with contribution:** Share whiteboards and lessons with **two-way annotation** to student devices, so every student can navigate and interact with content via internet browser, whether they're in or out of the classroom. Toggle from teacher-paced to student-paced and back anytime during the lesson, so every student can navigate the content.
- **Access to verified apps:** Choose from popular Android apps including Microsoft Office and Google web apps.

## SMART Ink – for Windows and Mac

**Markup anything, anywhere** – even in applications without ink tools. SMART Ink functions without an overlay, so your annotations remain even when you move between applications and revisit notes.

- Saves annotations into browser tabs, and Microsoft Office & Adobe PDF file formats
- Convert digital writing to text to insert into any file or text field
- Use presentation tools such as spotlights, magnifiers and more to guide student attention

## SMART Notebook® basic version & SMART Exchange

**Award-winning SMART Notebook basic version** is free learning software that helps you create dynamic, interactive lessons and deliver them on your SMART Board interactive display.

Keep learning lively with features like infinite cloning, text editing and 3D objects, and subject-specific tools like creative pens, equation editor and math tools.

Plus, access thousands of games, activities, and lesson plans made by other teachers with **SMART Exchange®**
