SMART Technologies
smarttech.com/demo

Simply the best technology for touch and ink.

Only SMART displays with iQ enable multiple users to intuitively write, erase, touch, and gesture at the same time, over any program or app, without interfering with another's tools.

With SMART displays, there's room for everyone

Let students naturally learn, express themselves and collaborate - without being constrained by the actions their classmates are taking.

Let's break it down:

- Up to **40 unique touch points**
- **Automatically detects interaction-type** – write, erase, touch, gesture and use tools without pressing a button
- Continuous differentiation of every interaction type, ALL the time – *not just "pen and touch" like the other guys.*

Truly intuitive for teachers and students

The "walk up and teach" whiteboard. Our designed-for-education whiteboard application includes built-in content and activities that make it easy for teachers to add interactivity and engagement on the fly – even if they've never used a SMART Board.

A teacher's favorite file type. SMART works effortlessly with PDFs and puts digital media at teacher's fingertips.

In 3 taps, teachers can turn a multi-page PDF into a full lesson and engage students by adding built-in content, search for images/video, or graphic organizers to organize notes.

Easily access content from Google Drive, OneDrive and Dropbox. Export lessons to PDF and share.

Built-in content:

- **Graphic organizers**
- **Assessment & polling activities**
- **Digital manipulatives & interactive backgrounds**
- **Freeform & categorized brainstorming**
- **Measurement tools**
- **Classroom tools like timers and spinners**
- **Integrated video and image search**

The power of SMART Ink

Simple markup shouldn't interfere with your teaching, and yet every other interactive display annotation tool freezes the screen!

Only SMART Ink software lets teachers write over and into web browsers, applications, and files on Windows and Mac - without blocking navigation with an overlay.

- Works on Windows and Mac
- No overlays: write and teach at the same time
- Intelligent activation - just pick up a pen and write
- Add the ability to write, move, resize, and use ink-to-text in any application without native ink tools
- Save your work with multiple capture options
